PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8717	SESSION NUMBER: 07
DATE OF SESSION: 21 Jan 88	DATE OF REPORT: 21 Jan 88
START: 1008	END: 1100
METHODOLOGY: CRV	VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: Access and describe the features and functions of the target structure(s) under construction at the target site.
2. (S/NF/SK) VIEWER TASKING: Previous sessions indicated purpose as that of "assembly". Need to pursue the sense of intended purpose and function of the key structure you have previously perceived.
3. (S/NF/SK) COMMENTS: Session pursued using Stage IV, V, and VI. Disclosed structure ability to send and receive data from space. Stage VI effort utilized to identify, perceive, feel and sketch space object in contact with structure. This should be Viewer's 18's last session on this project. No inclemencies noted.

memorandum

DATE: 21 January, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018
Session date: 21 JAN 88
Mode of operation: CRV

2. (S-SS) Cueing:

a. Describe the purpose of the site at coordinates 589281/856562.

3. (S-SS) Results:

a. The impressions of the building's purpose was perceived as that of a working place which has people there studying and learning how it works.

b. It has "flavors" of both military and civilian purposes, both of which seemed strongly related to the concept of "communications". The "military" seemed to drive emanations of "trucks" and "distance". The "civilian" drove emanations of "study", "learning", "knowing", and then "talking", "telling" and "saying" (but there was a noticeable absence of the concept of "teaching". There were several EI perceptions of "curiosity", "study", "learn", which all seemed related to the "civilian" perceptions.

c. The perception of "communications" also had emanations of "tall", "thin", "firm", "white". A stage III sketch was made on page 5 which shows most of this.

d. There were repeated very vague visuals of people standing face to face with the light coming from low, in front of each of them. Each seemed to be the source of the other's light. This drove an AOL of TV to TV communications.

e. In stage V, there was a strong perception of "layers" (see sketch, page 7). The individual "layers" were

not connected to each other, and each was made of many smaller layers, with a thick layer on top and many thin layers on the bottom. This had an allegorical feel to it, and translated itself to me as (AOL:) depicting several multichannel radio signals on the frequency spectrum.

f. In stage VI, there were impressions of energy emerging from the site in many (but maybe not all) directions, and energy coming into the site only from a high angle above the site (AOL: satellite). The energy was followed to its source, where a rounded "grid" (see drawing, page 9) was perceived. This rounded "grid" seemed to be full of equipment, but the energy appeared to be simply reflected off its surface, where I could see the reflections of many points which were sending the energy toward it.

INTERVIEW SUMMARY: THE IMPRESSIONS OF THE BUILDING'S AMBIANCE(?) IS THAT OF A WORKING PLACE, WHICH HAS PEOPLE THERE STUDYING & LEARNING HOW IT WORKS. IT HAS "FLAVORS" OF BOTH MILITARY & CIVILIAN PURPOSES. THERE ARE INDICATIONS OF "KNOWING, LEARNING, TELLING & SAYING," BUT I DON'T CONSCIOUSLY GET THE FEELING OF "TEACHING" (CAUSES SOME SMALL CONFUSION). THE IMPRESSION OF "COMMUNICATION" SEEMS TO HAVE A LOT OF COMPONENTS WHICH RELATE TO THE "TALL, THIN, FIRM, WHITE" IMPRESSIONS (ROL: SOME OBJECT?).

THE E/I'S OF CURIOSITY, STUDY, LEARN, ETC. SEEM TO RELATE MORE TO THE CONCEPT OF "CIVILIAN" ~~THAN~~ THAN TO "MILITARY".
